Description of Data in SRC2016.mdb

This document describes the tables contained in SRC2016.mdb in which data about performance of designated subgroups are reported by total public school (aggregated data for all districts and charter schools), county (aggregated data for all districts and charter schools in the county), Needs-to-Resource-Capacity (N/RC) group, district, and public schools. The tables included in this download are shipped with no indices to economize on file space and download time. You will probably want to create indices on BEDS_CD and other key fields to improve your local query performance. Please use this document to locate desired information in the tables of the same name in the School Report Card Database (SRC2016.mdb). In some cases, values may be stored as text items of length 255. This is an Access artifact. The content is of much shorter, but varying length, and usually formatted for presentation. If computations are to be performed with these numbers, please use the Val() function in any Access expressions to convert to a numeric data type. To ensure student confidentiality, the Department does _not_ publish data for groups with fewer than five students or data that would allow readers to easily determine the performance of a group with fewer than five students. When fewer than five students in a group (e.g., Hispanic) were tested, percentages of tested students scoring at various levels are suppressed for that group and the next smallest group. Suppressed data are indicated with an (s). However, the performance of tested students in these groups is aggregated and shown in the Small Group Total row.

ENTITY_CD

The ENTITY_CD in the following tables is the 12-digit Basic Educational Data System (BEDS) code that uniquely identifies the entity (school, district, etc.). The following information may be useful to researchers who want to select or aggregate data for specific entities.

Digits:	Indicate:
1–2	County of Location
3–4	City/Town of Location
5–6	School District Number
7–8	District or LEA Type
9–12	Reserved for Building

When:	Then:
Digit 1 = 3	Entity = New York City School/District and Digits 3 & 4 indicate Community School District
Digits 7 & 8 = 86	Entity = Charter School
Digits 9–12 = 0000	Entity = District

NEEDS_INDEX

A NEEDS_INDEX is a Need to Resource Capacity Category that is a measure of district's ability to meet the needs of its students with local resources.

Code:	Category:

7	Charter Schools

NYC DATA: New York when selected as a "County" on the interactive data site data.nysed.gov includes public and charter school data in the single NYC borough of New York. This aggregation is available in the SRC.mdb under ENTITY_CD 00003100000. NYC Public Schools when selected in the search bar on the interactive data site includes district and charter school data in all five NYC boroughs. This aggregation is available in the SRC.mdb under ENTITY_CD 0000990000000. The SRC.mdb also includes an aggregation of data for all public schools within the five boroughs of NYC, excluding charter schools, under ENTITY_CD 000000000001. This aggregation is not available on the interactive data site.

Need to Resource Capacity Categories

The need/resource capacity index, a measure of a district's ability to meet the needs of its students with local resources, is the ratio of the estimated poverty percentage[1] (expressed in standard score form) to the Combined Wealth Ratio[2] (expressed in standard score form). A district with both estimated poverty and Combined Wealth Ratio equal to the State average would have a need/resource capacity index of 1.0. (N/RC) categories are determined from this index using the definitions in the table below.

Category	Definition
High N/RC: New York City	New York City
High N/RC: Large City Districts	Buffalo, Rochester, Syracuse, Yonkers
High N/RC: Urban-Suburban Districts	All districts at or above the 70th percentile (1.1835) that have: 1) at least 100 students per square mile; or 2) an enrollment greater than 2,500 and more than 50 students per square mile.
High N/RC: Rural Districts	All districts at or above the 70th percentile (1.1835) that have: 1) fewer than 50 students per square mile; or 2) fewer than 100 students per square mile and an enrollment of less than 2,500.
Average N/RC Districts	All districts between the 20th (0.770) and 70th (1.1835) percentile on the index.
Low N/RC Districts	All districts below the 20th percentile (0.770) on the index.

[1] **Estimated Poverty Percentage:** A weighted average of the 2006–07 and 2007–08 kindergarten through grade 6 free-and reduced- price-lunch percentage and the percentage of children aged 5 to 17 in poverty according to the 2000 Decennial Census. (An average was used to mitigate errors in each measure.) The result is a measure that approximates the percentage of children eligible for free or reduced-price lunches.

[2] **Combined Wealth Ratio:** The ratio of district wealth per pupil to State average wealth per pupil, used in the 2007–08 Governor's proposal.
